

# QUICK COUPLING INTERCHANGE

## TERMS AND CONDITIONS

---

Quick Coupling Technologies, Inc. (herein called "QCT") warrants the products described in this cross-reference guide to be free from defects in material and workmanship for a period of (1) year from date of shipment by QCT under normal use and service.

QCT's sole obligation under this warranty is limited to repairing or replacing, at its option, any product found to QCT's satisfaction to be defective upon examination. The repair or replacement of any defective product will be made without charge for parts or labor.

This warranty shall not apply to: (a) parts or products that have been subject to abuse, negligence or misapplication; (b) parts that have been added to the original product, such as but not limited to fittings, bushings and reducers, and were not part of the product originally provided; (c) parts that have been altered or repaired by someone other than QCT.

To the extent permitted by law, this limited warranty shall extend only to the buyer and any other person reasonably expected to use or consume the goods who may become injured by any breach of said warranty. No action may be brought against QCT for an alleged breach of warranty unless such action is instituted within one (1) year from the date the cause of action accrues.

Other than the obligation of QCT set forth herein, QCT disclaims all warranties, expressed or implied, including but not limited to any implied warranties of merchantability or fitness for a particular purpose, and any other obligation or liability. The foregoing constitutes QCT's sole obligation with respect to damages, whether direct, incidental or consequential, resulting from the use or performance of the product.

Product dimensions, performance, characteristics or material properties are subject to change without notice.

Brand names used in this cross-reference guide are the property of their respective manufacturers.

Products in this cross-reference guide can cause serious injury to equipment and persons if not used properly. Never exceed rated pressures stated in the QCT catalog. Stated working pressures are rated in PSI. Inspect products on a regular basis while in service. Products in this cross-reference guide are used in thousands of applications in varying situations. It is not possible for us to warranty the use of a specific product for a singular application. The user is responsible for selecting, installing and testing the final configuration to ensure that all performance, safety and warning requirements are met.

**About Industry Interchanges...** It is possible to connect two different manufacturer's parts together so that they will affect a seal and work properly in a fluid system. QCT cannot guarantee the quality, workmanship, dimensions or tolerances of other manufacturers' parts, even though they might be interchangeable. Therefore, whenever mixing parts, the final assembly must always be tested before being put into service. Failure to test could result in a sudden failure of the coupling causing severe personal injury or death.

Over-pressurization could result in a sudden failure of the coupling causing severe bodily injury or death. Be sure to select the proper coupling for your application and use is only within the specified service pressure range.

Couplings do wear out. In order to avoid severe bodily injury or death, couplings must be routinely checked for condition and replaced if necessary.

Hydraulic Quick Couplings
